

SUPRA-PD Grinder Series

www.acerlinks.com • www.aceronline.net (U.S. only)

Technology

Creativity

Reliability

An Unswerving Commitment to Excellence

MAIN FEATURE

- ① Spindle run-out within 0.00015"
- ② Enlarged honeycomb-ribbed column is designed for heavy duty grinding
Standard high is at 28-5/16"
- ③ Continuous flood type lubrication system to reduce machine wear and maintain the accuracy of the machine
- ④ Revolutionary proximity switch on table and crossfeed movement
- ⑤ Zero-setting slip rings with vernier scale on Y axis.
- ⑥ Crossfeed precision ball screw allows for zero backlash
- ⑦ Saddle lock/unlock device
- ⑧ Turcite-B coated spindle housing
- ⑨ Direct drive spindle motor Front mount flanged type spindle design for heavy duty grinding
- ⑩ Able to hold more than 1,000 lbs as work load
- ⑪ Preset table speed hydraulic control allows for fine increment of table speed
- ⑫ Three axes fully PLC controlled system with touch panel display.

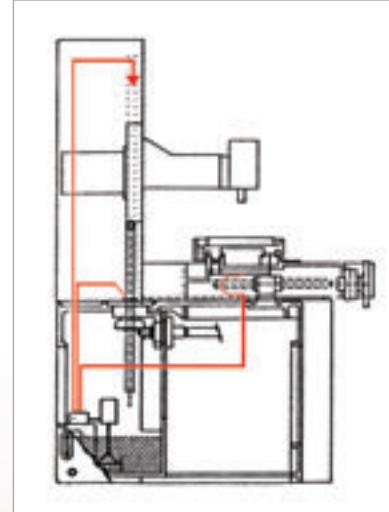

- ⑬ FC-25 casting iron allows for maximum damping and stress relief
- ⑭ Safety 24V control circuit.
- ⑮ Power disconnect safety device on electric-cabinet
- ⑯ Machine weight more than 7,000 lbs
- ⑰ Leveling bolts and pads
- ⑱ Magnetic separator & paper filter system

MAIN FEATURE

■ Supra-1020 PD

- 3HP spindle motor
- Front mount spindle with run-out within 0.0001"
- Over all flatness within 0.00015" at 10"X20" grinding capacity
- Revolutionary sensor triggering directional control valve
- PLC controlled 24 volt control circuit
- Full ribbed machine base and column
- Two speed rapid elevation travel
- Recirculating auto lubrication system for all slideways and leadscrews
- Turcite-B coated table and crossfeed ways
- Precise stepping motor for downfeed increment control -- 0.00005-0.002"
- Electronic saddle lock device
- Table speed is adjusted with flow-control turning knob
- FC 25 casting weighing at 3,916 lbs
- Hold maximum work load at 840 lbs

Recirculating auto lubrication system

SUPRA-1020 PD

SUPRA-1632 PD

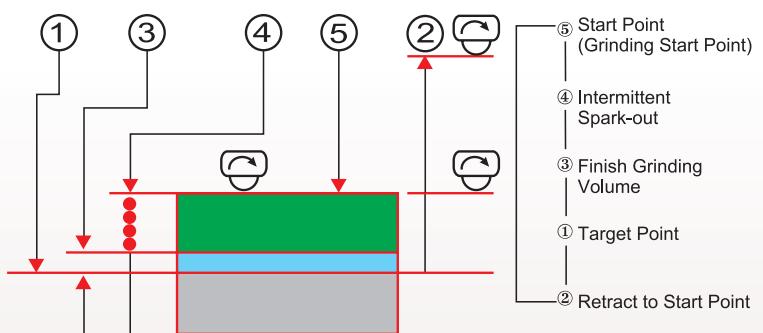

■ Standards

manufactured to exact to tolerances:	D.I.N.	J.I.S.	ACER STD
Parallelism of longitudinal movement	0.0004"/8"	0.0004"/18"	0.0001"/18"
Parallelism of cross movement	0.0004"/6"	0.0004"/6"	0.00012"/6"
Parallelism between spindle centerline to table surface	0.0004"/4"	0.0008"/12"	0.0004"/12"
Squareness between spindle centerline to table movement	0.0002"/4"	0.0008"/12"	0.0006"/12"
Squareness of longitudinal movement to cross movement	0.0004"/4"	0.0008"/4"	0.0006"/10"
Squareness between vertical,cross & longitudinal movement	0.0004"/4"	0.0004"/4"	0.0008"/12"
Run-out of spindle nose	0.0002"	0.0004"	0.00008"

HUMANWARE FOR HIGH PRECISION

- On PD models, user can set the vertical zero point, start point, finish grinding volume, target point and the grinding wheel start point. The machines features a simple & clear digital display & touch control panel for easy learning and efficient operation.
- Vertical feed powered by an efficient AC motor for rapid up / down, stepping motor for slow up / down movement and downfeed increment.
- Vertical positioning is displayed on the screen showing spindle position and setting the start point, rough grinding volume, finish grinding volume, downfeed volume for finish grinding, target point, and intermittent spark-out position.
- Cross transverse travel is powered by a brushless DC servo motor. This allows step feeding & continuous infeed grinding. The speed of wheel dressing can be adjusted on the panel.

Patented elevating transmission mechanism

Table travel adjustment, provide built-in-type(hidden) proximity switches to feature safe & easy operation.

Enlarged double-V base. The guide ways are equipped with recirculating lubrication to resist wear on the guide-ways, increase machine accuracy, & reduce vibrations during grinding.

1228-2040 models table speed control

Honeycomb-ribbed column

NEW GENERATION HUMANWARE

■ COLUMN

Enlarged honeycomb ribbed column especially suitable for heavy duty grinding.

■ HIGH ANTI-WEAR GUIDE-WAYS

The saddle rests on precision hand scraped double V ways, and the table rests on precision hand scraped V and flat ways which coated with "TURCITE-B". These guide ways are equipped with recirculating lubrication system to resist wear of guide ways, and provide stable movement and repetitive accuracy.

■ CROSS FEED

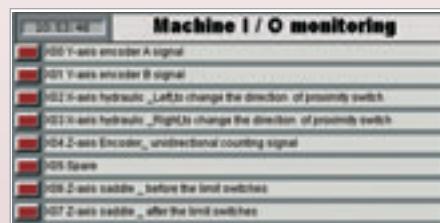

Cross feed ball screw is driven by Brushless DC motor, and there are have two speed rates - rough and finish grinding speed to increase grinding efficiency and grinding accuracy.

■ OPERATION PANEL

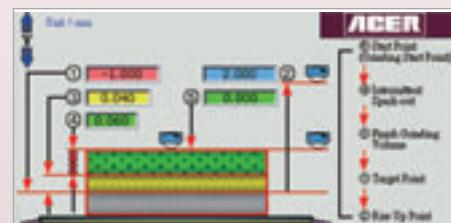

Delta's 7.2" touch color screen is equipped with Delta's PLC digital control and ACER'S unique touch-mode operation system. They are easy to learn and operate.

System Data

OPTIONAL ACCESSORIES

Frequency Inverter

Electric Parallel Dresser

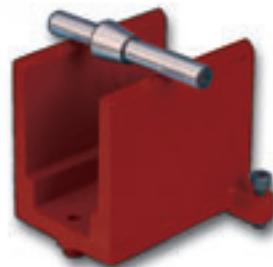

Digital Readout

Wheel Flange

Halogen light

Balancing Stand

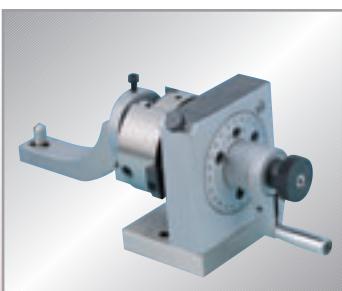

Roller Type Balancing Stand

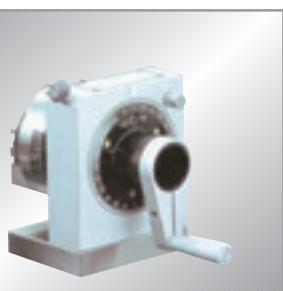

Precision Vise

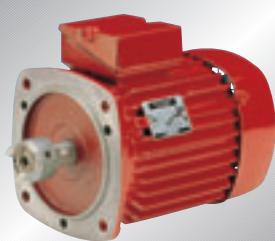

Concave / Convex
Forming Dresser

Bi-directional
Punch Former

Single-directional
Punch Former

Dynamic balanced V-3
graded spindle motor.

Crossfeed lock and
proximity switch design for
crossfeed travel. (Model
1020 & above)

OPTIONAL ACCESSORIES

Dust Suction & Coolant System

Permanent Magnetic Chuck

Electro Magnetic Chuck

Coolant System with Magnetic Separator

Coolant System

Coolant System with Paper Filter & Magnetic Separator

Dust Collector

Overhead Parallel Dresser

Chuck Control With Demagnetizer

Stepping motor on downfeed system ensures an accurate downfeed amount. (Model 818)

Crossfeed with ball screw design eliminates backlash. (Model 1428 & above)

Front mount four screws spindle with 4 super precision angular ball bearing. (Model 1428 & above)
