CNC Vertical Lathe Machines

Service & Parts

Our large Service and Parts staff provide outstanding support to its distributors and customers.

FEMCO Service Engineers come equipped to get your machine up and running as soon as possible. FEMCO USA has a large well stocked parts department.

Applications

Our highly qualified Applications experts offer the following services:

- Personnel Instruction
- Training Services
- Applications Consulting
- Turnkey and Part Processing Services

Manufacturing high quality machine tools since 1958

VL-12

VL-25

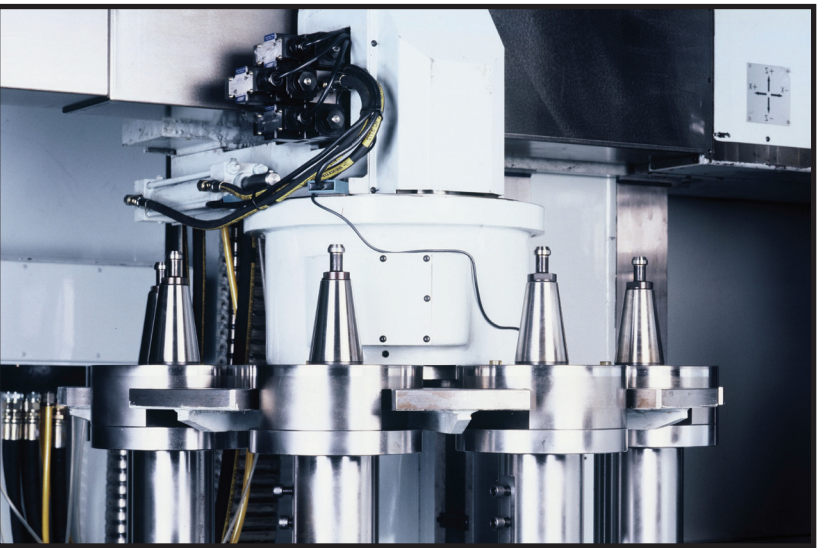

Machine Features

- Both the VL -12 and VL-25 incorporate a pair of extra large columns, each with two precision ground Box Ways, all to support an Adjustable X-Axis Cross Rail.
- The Adjustable X-Axis Cross Rail is made of heavy duty cast iron and incorporates precision ground Box Ways, which support the Z-Axis Ram with exceptional rigidity.
- Cross Rail adjusts up and down in precise 100 mm (3.93 inches) increments with a total vertical traverse of 1000 mm (39.4 inches) for the VL-12 and 1,500 mm (59.0 inches) for the VL-25.
- Adjustable X-Axis Cross Rail allows for minimal extension of the Z-Axis Ram allowing the operator to "choke up" to the work piece for maximum rigidity.
- The Z-axis linear scale produces closed loop feedback control for long term accuracy.
- The automatic tool changer holds 8 interchangeable tools.
- A pendant controller with counter balance weights provides convenient and comfortable operation.

Standard Accessories

- 4 jaw manual chuck
- Work light
- Splash guard
- Crossrail sideway cover
- Crossrail elevation pointing device
- FANUC OiTC CNC controller
- Service Tools
- X, Z-axes linear scale
- Bolts and leveling pads for installation
- Coolant circulation system
- 1" and 1.25" tools shank

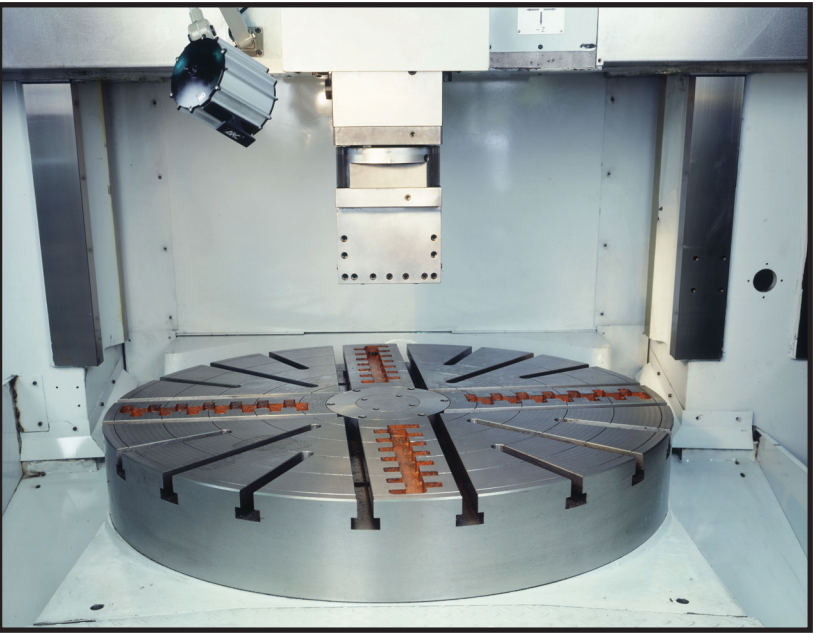

Automatic Tool Changer

The automatic tool changer employs the CT-50 tooling system, consisting of 8 tool holders. Tool selection is bi-directional and by shortest route.

CNC Controller

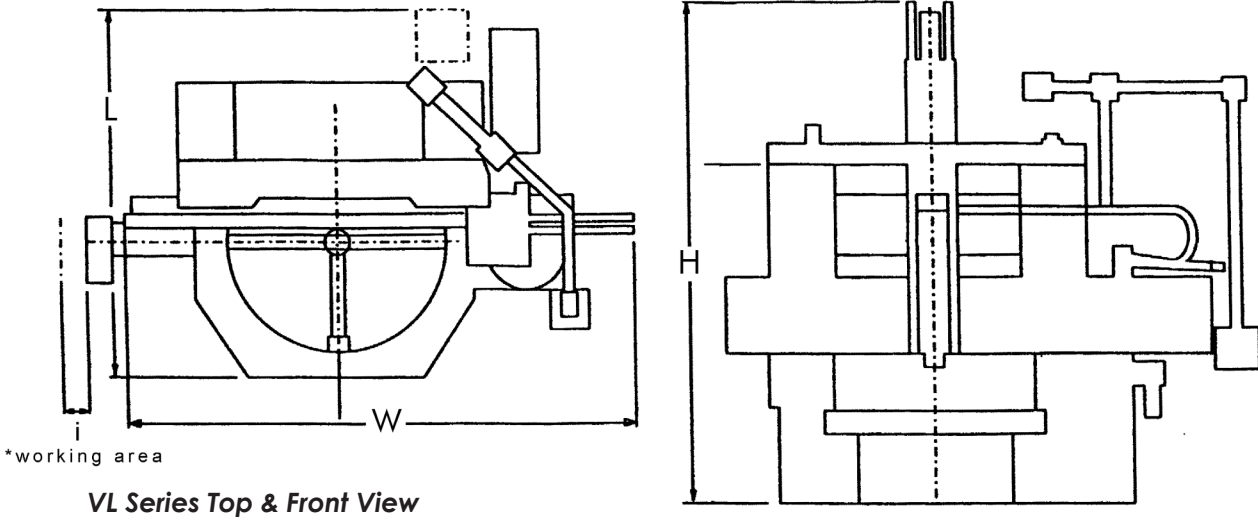

The pendant controller is movable for convenience of operation. It is equipped with a movable MPG for easy setups on the machine. A FANUC OiTC controller is standard.

Table

The table is manufactured from high tensile Meehanite cast iron. The parts clamp plates are manufactured from ductile iron. The table runs on crossed roller bearings, preloaded to resist heavy duty cutting loads in any direction.
